As a Rule Our Cannas Travel Well

Either by mail, express or by fast freights, as hundreds of letters similar to the following testify:

SANTA ROSA, SONOMA CO., CALIFORNIA, March 16, 1897.

MR. ARNOLD PUETZ,

Dear Sir:—The plants arrived to-day in best condition. They were unusually well packed, very much better than eastern firms usually pack for the long overland journey.

Respectfully, LUTHER BURBANK.

BALTIMORE, August 21, 1901.

ARNOLD PUETZ, ESQ.,

PAMPAS GROVE, GREENLAND, FLA.

DEAR SIR:—Replying to yours of the 19th, we accept the same and trust you will take special interest in seeing that we get first-class stock, as we are offered roots for just half this price, but yours have turned out so finely for us that we are willing to pay this in order to secure the very best article.

Yours truly,

L. G. S.

J. BOLGIANO & SON,

Please remember, if at any time you should forget our full address, that it is sufficient to write simply.

**PAMPAS GROVE,
Greenland, Florida.**

THE LATELY INTRODUCED Orchid Flowering Cannas.

154. **American Yellow Canna, Burbank.**—A clear, beautiful, yellow-flowered Canna, flowers of magnificent size—fully twice as large as Mme. Crozy—the three upper petals spreading fully seven inches, and the form is really semi-double; toward the inner part of the lower petals show fine crimson spots; all the rest of the flower is a most beautiful rich canary-yellow. The plant is a very strong grower, with rich green leaves, very wide almost to the tips; its leaves are much thicker than those of the ordinary Cannas, with a texture not unlike the rubber plant. This variety stands the sun admirably..... 8c.
150. **Austria.**—Pure canary yellow; fine large open flowers, with but few traces of reddish-brown dots in the centre of the two inside petals, 8c.
155. **Allemania.**—Exceptionally large flowers, frequently measuring 6½ inches across; the upper petals salmon with broad border and markings of golden-yellow, while the lower petal is dark salmon marked with yellow in the centre; foliage dark green..... 10c,
1. **Flacida.**—This is our native Canna, the parent of the Orchid Flowering Cannas. It should be in every collection..... 10c
158. **Italia.**—Bright scarlet, with broad orange yellow border, forming a combination approached in beauty by no other Canna. It is a strong, rampant grower, with broad, heavy foliage, and its bright colored flowers make it a thing of beauty the entire season..... 12c
159. **Kronus.**—Also an Italian variety of a much more darker coloring, and the markings are more delicate than in any of the others of this class..... 12c
265. **Mrs. Kate Gray.**—The plants attain a height of 6 to 7 feet, with broad and massive foliage of a bright glossy green, similar to a Musa Euseta in size and substance, and forms a beautiful foil to the gigantic trusses of flowers, which are of a rich shade of orange scarlet, overlaid with gold, and measure from 6 to 7 inches across; individual petals often measuring 2 inches in width. The habit of the plant, size of truss and individual flower, together with its superb coloring, make this one of the most desirable Cannas..... 15c
162. **Partenope.**—Flowers of extra large size, the broad, wavy petals glisten like silk; the prevailing color is orange, delicately streaked with scarlet tints, and suffused with salmon; early and a free bloomer; green foliage..... 15c
268. **Pennsylvania.**—The Giant Orchid Flowering American Hybrid Canna; solid red flowers, overlaid with carmine stretches, very substantial flower, of heavy texture, expressly suited for centre plants in connection with other orchid flowering kinds..... 30c

Our Standard Well-Tried Cannas and Grand New Varieties.

30. **A. Bouvier.**—A grand scarlet bedding sort..... 10c
46. **Acme.**—A fine yellow, with broad overlapping petals and splendid trusses of large flowers; a short jointed, free growing variety, with light green foliage..... 12c
50. **Alsace.**—In this variety we have the nearest approach to a pure White Canna; a wonderfully free bloomer and a fine, erect grower. The flowers at first opening are a white sulphur yellow, changing to creamy white. A grand variety for contrasting with darker colored sorts; will produce effects in bedding that no other Canna can..... 10c
184. **Augusta.**—Flowers five inches across, intense scarlet, widely bordered with clear golden yellow; largest gilt edge variety to date, and entirely distinct in color and form from all others..... 10c
88. **Admiral Avellan.**—Acknowledged by all to be one of the very best dark-foliaged varieties. It is a rich orange scarlet, overlaid with salmon in such a manner as to give the whole flower a rich, luminous appearance..... 10c
210. **Buttercup.**—Real bright buttercup yellow, large, handsomely formed flowers in fine open trusses: always clean and bright. It bleaches less in sunshine than any yellow canna, and like Philadelphia, it sheds the old flowers; thus leaving the trusses always bright and fresh..... 12c
230. **Betsy Ross.**—A beautiful soft pink Canna, worthy of an illustrious name. The flowers are medium size to large, and the color about as handsome as we could ask a pink Canna to produce, and above all stands the sun well. It is a compact grower; a very free bloomer, the trusses being large, erect and nicely placed above the rich green foliage..... 16c
177. **Black Prince.**—An exceedingly choice new variety. Flowers of immense size, dark velvety crimson, with a luminous lustre—very brilliant. An exceedingly free bloomer..... 12c
108. **Beaute de Poitevine.**—A fine dwarf, compact grower. Flowers are of good size, crimson scarlet, with no shading of any kind. A free bloomer, throwing up large trusses of bloom. Foliage is very distinct—glaucous green..... 10c
197. **Crimson King.**—This is the finest bright, clear, crimson scarlet intensely glowing color, without a trace of yellow in any part of the flower; bright, clear green foliage, very showy and effective if used in bordering large Canna beds; also a fine pot Canna. A very early and free bloomer of dwarf habit, 8c
70. **Crimson Bedder.**—Dazzling crimson, a bedding Canna of special merit, that is always in good condition in all kinds of weather..... 12c
80. **Comte de Bouchard.**—Very similar to Florence Vaughan, but the flower is a trifle larger and spots a trifle heavier and darker..... 10c

261. **Cherokee.**—This Canna is a Royal Beauty. Color, a shade of rich, dark maroon; the petals are broad, soft and as fine as velvet. The flowers are similar in form to Black Prince. Trusses are large, erect and borne nicely above the foliage. It is a vigorous grower and always in bloom; an excellent bedding Canna. The foliage is fine and of a light green color..... 20c
199. **Cinnabar.**—Cinnabar red, edged with distinct golden band; fine round flowers of great substance, held well above the foliage in large well-formed trusses, of good habit, and an early and free bloomer..... 10c

CORDOVA—Our own. Will be introduced next year. See special list.

19. **Charles Henderson.**—A free, continuous bloomer; large, compact trusses of flowers of splendid substance; color solid crimson..... 8c
103. **Chicago.**—Grand vermillion scarlet; flowers very large and flat, petals broad and five in number, composing a magnificent flower in a very large truss; erect in growth; foliage bright green. The heavy texture of the bloom renders them very durable..... 10c
109. **Cote d' Or.**—This dwarf variety has flowers of the pure gladiolus shape: color saffron yellow, with reddish amber blotch in the throat; a very useful low growing yellow, of very clear, fair appearance..... 10c
- I75. **Defender.**—An excellent variety. The coloring is bright, clear yellow, heavily spotted scarlet, forming a combination equalled by no other Canna. It stands sun and storm well..... 12c
179. **Depute Ravarin.**—A pretty and pleasing sort, with good-sized, deep garnet flowers, a shade lighter than the favorite Alp. Bouvier, which it much resembles, except that the truss of flowers stand erect and is much larger. 10c
183. **Duke of Marlborough.**—A superb variety, with dark velvety crimson maroon flowers, the darkest of all Cannas. A sturdy, erect grower, with bluish metallic green foliage..... 12c
190. **Duchess of Marlborough.**—A pure pink variety, very attractive and beautiful; has fine large flowers, four inches and over across. This is a new shade in Cannas. The plant is a strong, robust grower..... 12c
210. **David Harum.**—Dark bronze foliage; grand grower and free bloomer. Seven flower stalks, containing twenty-five flower spikes, seen at one time on one plant. Flowers large; round petals. Bright vermillion scarlet, dotted with crimson spots..... 15c
198. **Dr. Nansen.**—Remarkably large branching trusses, flowers clear pure yellow, constant and abundant bloomer; the petals are thick and durable, retaining their freshness through all kinds of weather..... 12c
98. **Egandale.**—This is a dwarf, very compact, free-blooming, dark-leaved variety. Foliage is dark greenish maroon; flowers bright cherry. An exceedingly free bloomer, and a favorite sort..... 10c
65. **Eldorado.**—Almost a pure self bright golden color; broad petals form a beautiful wide open flower: spike of bloom very compact; quite dwarf; foliage bright green..... 12c

115. FLORIDA—Our own.

- Introduced a few years ago, a truly beautiful flower. Orange crimson lines on a flaming scarlet ground, which is marbled and bordered on the outside. The most striking and richest coloring ever found in Cannas up to this day, the well rounding and lasting petals sparkling like fire; a favorite for pots as well as for bedding... 15c
100. **Flamingo.**—A splendid, compact, dwarf grower, throwing up erect, compact heads of bloom of immense size; the individual flowers are among the very largest. Color, dark crimson, center of the flower marked with golden pencilings. This is one of the very handsomest varieties. Its dwarf habit will make it valuable for outdoor bedding in conjunction with others..... 12c
208. **Floribunda.**—This variety is well named, being an extraordinarily free bloomer, equally as good in color as Eldorado, being a bright yellow, slightly dotted with light red, and, like Eldorado, the effect produced is almost pure golden yellow..... 12c
72. **Florence Vaughan.**—A grand yellow or bright golden shade, heavily dotted with bright red. Very broad petals, forming an elegant flower; spike large and compact. A dwarf grower, texture of flower extra good. The best of all yellow spotted with red..... 10c
196. **F. Neuvessel.**—A fine dark-leaved variety; foliage is very handsome. Orange scarlet flowers, showing a pinkish tinge on the older blooms. Tall grower and very free bloomer..... 10c
113. **Fair Persian.**—A tinted creamy white, covered all over with small rose-colored spots, making a combination that is very attractive to some people..... 8c
121. **Gloire de Montel.**—In color this variety is very similar to Queen Charlotte. The cluster of bloom is very large and very compact and full. Flowers large and spreading, the two colors about equally divided..... 15c
142. **Golden Bedder.**—Bright golden yellow, a fine bedding Canna..... 12c
126. **Gloriosa.**—Color, bright rich crimson, with wide border of deep golden yellow. A showy and handsome variety. Invaluable for bedding and also for house culture..... 10c
182. **Improved Duchess of Marlborough.**—A very pretty shade of pink, unlike the old Duchess of Marlborough, the trusses are erect. It is a very free bloomer, rather tall, vigorous grower; foliage green and abundant..... 10c
135. **J. C. Vaughan.**—Dark purplish foliage, with very large vermillion-orange flowers of a satiny lustre. Flower spikes very large and showy, 10c
91. **J. D. Cabos.**—Dark greenish maroon foliage, with a bronze metallic lustre. Flowers bright orange or apricot, sometimes brightened with a pinkish tinge. One of the most distinct of the Cannas..... 10c

97. **J. D. Eisele.**—A magnificent vermillion scarlet, overlaid with orange. It is a strong free grower, and is without question, the finest scarlet yet offered..... 10c
129. **Janus.**—Flowers extra large; color, clear yellow, finely dotted with brightened red; petals of great substance and very durable..... 12c
89. **John Laing.**—Extremely free in bloom; flowers large and broad oval petals; splendid substance; extra good; color, deep apricot scarlet..... 10c

JACKSONVILLE FIRE—Our own. Will be introduced next year. See special list.

79. **Kaiser Wilhelm. II.**—Flowers not as large as some varieties, but still of good size, and especially valuable on account of its exceeding floriferous and very dwarf habit..... 8c
106. **Louis Colomb.**—Beautiful purple foliage. Very large flower, composed of large, broad petals. Color, clear salmon, marbled in scarlet, with throat of rosy salmon; extra fine..... 10c
200. **L. Patry.**—Orange-salmon, showing a pinkish sheen on the older flowers—an entirely distinct color; very bright and effective. Large flowers and truss. An exceedingly free bloomer..... 20c
204. **Lvray.**—A very fine new pink variety, with flowers and trusses of the largest size. Flowers are as large as Rosemarie, but are very much darker, being a dark rose pink. An exceedingly free bloomer, and a fine thing in every respect..... 20c
205. **Montana.**—Flowers are bright creamy yellow; bears wind, sun and rain well; grows even and regular, makes fine trusses, has good green foliage, and is excellent for bedding. The flowers are large. No other Canna of this color..... 20c
107. **Mme. Rozain.**—Flower of extra size, composed of immense oval petals. Brilliant scarlet cardinal, with a thread of gold along the edge, and a touch of it in the throat..... 15c
119. **Mme. Perrin des Isles.**—The nearest approach to a pink yet found among the new Cannas, being much the shade found in many flowering Begonias..... 15c
117. **Mlle. Liska Lorenz.**—Very free in bloom. Peculiar shade of salmon and orange, with odd suffusion of light scarlet and thread-like edge yellow..... 15c
111. **Mme. A. Bouvier.**—Flower large and spreading, a medium shade of red, dotted with deep crimson. The bright yellow color of the edge is applied irregularly, and is carried down into the throat of the flower. A magnificent variety of singular exotic beauty..... 30c
116. **Mlle. Berat.**—A decided acquisition on account of its color, which is the nearest approach to a pink, is a first-class bedder. Many of the sorts heretofore offered as pink, while very pretty in the individual flower, have a "washed-out" appearance both on the single plant or when planted in masses. In this variety, however, the larger the mass the finer the effect, and when planted with yellows and high-colored reds it is simply superb..... 12c
201. **Martha Washington.**—The flowers are very large and frequently have five broad petals; the trusses are immense, and the color pure bright rose; very beautiful and attractive, a vigorous grower and a most constant and abundant bloomer..... 15c

MIAMI—Our own. Will be introduced next year. See special list.

89. **Michel Favrichon.**—An exceedingly free and early bloomer and a very strong grower. Flowers are exceedingly large and very showy; bright orange, slightly shading to carmine and dotted with carmine..... 12c
128. **Maiden's Blush.**—Very beautiful pure pink flowers, borne in fine compact trusses, continuously throughout the season; the only variety of this color yet introduced; handsome deep green foliage, distinct and pleasing..... 12c
2. **Madame Crozy.**—The flowers of this well-known and popular variety are of a bright crimson-scarlet, bordered with golden-yellow..... 10c
207. **Niagara.**—The markings are somewhat like Gloriosa, but the flower is larger and the truss uniformly larger. The center of the petal is exceedingly bright crimson, bordered and sometimes indented with deep bright golden-yellow. The amount of yellow varies on different flowers, the contrast producing a most showy and striking effect..... 20c
166. **Othello.**—Dark, rich purple foliage. An early and constant bloomer, bearing large trusses of splendid orange scarlet flowers. One of the most beautiful dark-leaved varieties ever offered..... 10c
62. **Obelisque.**—Two and a half feet. Flowers, large, with flat face, giving a form of great beauty. Center, vermillion red with border of gold..... 10c
60. **Orange Queen.**—A dwarf compact grower, very free bloomer; fine orange gold, very distinct and beautiful..... 10c
96. **Paul Marquant.**—The individual flowers are larger than any others and flowering spikes very large, each flower standing out separately by itself. The flower is as fine as the finest orchid. The color is a very light salmon, with a carmine tint. The flower has a silver lustre, which glistens and lightens it up with a silvery sheen..... 12c
101. **Papa.**—Very free flowering, producing a mass of bloom in good sized spikes. Color, clear red; a sturdy dwarf grower..... 15c
112. **Pierson's Premier.**—A seedling from Queen Charlotte, of very dwarf habit, and bolder in its color markings than the parent, the crimson center being more solid and more brilliant..... 12c

199. **Pink Ehmanii**—A most grand and handsome plant; large banana-like foliage, with bright rose-pink flowers. A truly noble Canna.....15c
 146. **President McKinley**—A very handsome, deep crimson variety; grows low and compact; elegant large trusses of beautifully formed flowers.....12c
 212. **President Max Michelli**—This is the finest and largest-flowered of all the dark-leaved varieties. Bright orange-scarlet, shaded carmine, with bright carmine splashings. Flowers are as large and fine as any of the green-leaved cannas. Dwarf grower.....20c
 120. **President Cleveland**—A fine, compact, vigorous grower, throwing up numerous flower spikes of immense trusses and flowers of very large size. One of the showiest varieties. Color, bright orange-scarlet—about the same shade as Robert Christie and Chicago.....15c
 54. **President Carnot**—Orange scarlet, slightly shaded pink. Foliage, deep chocolate maroon, one of the best of the dark-leaved sorts.....12c
 193. **Philippe Rivoire**—Bright scarlet, mottled and tinged with carmine, with a very narrow golden margin. Very handsome and distinct flower. Rather tall grower, with beautiful foliage. Free bloomer.....12c
 127. **Philadelphia**—Exceedingly brilliant; a bright, glowing crimson, very rich and velvety. It is a very early, very dwarf, and a very profuse bloomer. Extra good and extra desirable in every way.....20c

PONCE DE LEON—Our own. Will be introduced next year. See special list.

105. **Queen Charlotte**—This is indeed a queen among Cannas; it is entirely distinct from any other variety offered. Our illustrations shows the shape and marking of the flowers, which are very large, with broad, rounded petals, slightly recurved; they are borne in immense heads, well above the foliage, and are most striking in color. A bright orange scarlet, deeply edged with bright canary yellow. The plant is of dwarf habit, a sturdy, compact grower, with deep green Musa-like foliage. A perpetual bloomer and one of the finest.....10c
 296. **Queen of Holland**—This is a most beautiful pure deep orange-colored Canna, with purple foliage, and being the national color of Holland, and a splendid novelty, we have named it in honor of the Queen of Holland. Makes handsome, well-balanced plants, 3 to 3½ feet high, and nicely formed, erect trusses of perfectly beautiful deep orange colored flowers.....30c
 180. **Rosemawr**—Very distinct, and one of the most showy and handsome of all the pink Cannas. The flowers are extra large, having broad, well-rounded petals, frequently two inches across. The color is bright, rosy-pink, elegantly mottled with rose, shaded rich golden yellow at throat. The trusses are immense.....12c
 181. **Red Indian**—Purple foliage. The flowers, which are light red, are of a good substance: a fine variety in every way.....20c
 118. **Robert Christie**—Bright orange-scarlet. A particularly strong growing variety, throwing up tremendous heads of bloom. Placed by the side of other varieties of like description, it displays its superiority both in freedom of bloom and size of flowers.....10c
 133. **Rose Unique**—Rosy Carmine10c
 140. **Sam Trelease**—The greatest merit of this variety is that the flowers open out flat, which, with its very broad petals, which are of good substance, makes a large, nearly perfect, circular flower, different from all other sorts. In color, it is the nearest approach to a pure scarlet yet introduced. Very rich and glowing: the edges and center are marked with yellow, about the same as in Mme. Crozy.....10c
 52. **Salmon Queen**—Clear salmon, solid color; exceedingly fine, vigorous grower. One of the very best10c
 160. **Secretaire Chabanne**—Salmon-colored Cannas are, as a rule, not sought after to any great extent, but in this variety the color is so rich and pleasing as to be entirely distinct, and while it is valuable for planting as a separate specimen or in masses by itself, its greatest value consists in massing it in conjunction with other high-colored sorts, with which it not only harmonizes, but appears to intensify their color.....10c
 114. **Souvenir d'Antoine Crozy**—The richest gilt-edge variety yet introduced; the flowers are large, with well-rounded petals, which are of intense scarlet crimson, rich and dazzling, and are bordered with a broad, rich golden yellow band; in habit the plant is all that could be desired, being of strong, vigorous but dwarf habit, forming symmetrical compact plants.....10c
 122. **Souvenir de Mme. Crozy**—Large garnet red flowers, with broad border and large center of a brilliant yellow; rich green foliage.....16c
 211. **Souvenir de Mme. Nardy**—A beautiful mottled variety; bright golden yellow, heavily spotted with the most intense scarlet. The variegation is similar to that of Florence Vaughan, but the colors are much deeper and brighter. It is entirely distinct from Florence Vaughan, and is one of the most beautiful variegated Cannas ever raised; tall grower.....20c
 48. **Sunset Glow**—Appropriately named, the color having an oriental richness that resembles the tints of the sunset; superb; very free flowering.....10c
 288. **Striped Beauty**—A most odd and interesting variety. Color pretty buff yellow or creamy white, finely striped all over with soft rich crimson; moderate sized flowers, of good form and great substance; foliage green.....30c
 176. **Tennyson**—Fine, beautifully formed flowers, borne in large, erect, branching heads. Color, deep rose pink. Petals delicately marked and shaded with buff and fawn; quite distinct and handsome10c
 136. **Tarrytown**—A grand bedding variety, of a brilliant cherry red; more brilliant than Egandale; a compact, vigorous grower; a remarkably free bloomer, and a variety that stands wind and rain better than any sort yet offered. 10c

152. **W. G. Eisele**—A very robust growing variety, large pink straw-colored flowers, a novel shade in Cannas. Foliage green..... 12c
 189. **West Grove**—Rich green foliage, and is an exceedingly strong, vigorous grower. The flowers are large, very well shaped and their substance is something remarkable. The color is a rich coral pink, slightly dappled with bright crimson and shaded with yellow in the throat, a decidedly new shade among Cannas..... 30c

VARIEGATED AND TALL

Ornamental-Leaved Cannas, for Foliage Beds.

- Black Beauty**—By far the handsomest of all the dark-leaved Cannas. While the flower is insignificant, the exceeding beauty of the foliage more than compensates for this, and where foliage effect alone is desired, nothing richer and handsomer can be found. Foliage is large and massive, of the richest bronzy purple color, shaded with black, with beautifully crimped or undulating edges. Foliage is almost as rich and striking in color as a dracena..... 30c
Brenningsi—Green leaves striped and blotched creamy white. The only Canna with leaves of this character. Medium height,..... 8c
Robusta—With good cultivation, grows ten feet high, with immense leaves $4 \times 1\frac{1}{2}$, of dark bronze and green color..... 10c
Discolor—A magnificent foliage Canna, grows to large clumps and very tall in good soil..... 10c
RAINBOW—A variegated leaf Canna, very quick growing, but of dwarf habit. Where foliage effect is desired, in connection with other cannas nothing will give better results..... 8c

We cannot afford to grow or sell other than the best, and with our Cannas goes the assurance of satisfaction, the outgrowth of frugal industry and years of experience. Do not forget this.

ST. JOHNS—Our own. Will be introduced next year. See special list.

For the convenience of our many patrons and friends, and those who are directly or indirectly interested, we are issuing this list of the

**Best Cannas for the Season
1902-3.**

We are growing Canna Bulbs for the Trade on quite a large scale, and the name

“PAMPAS GROVE”

IS A

Guarantee of Superior Excellence

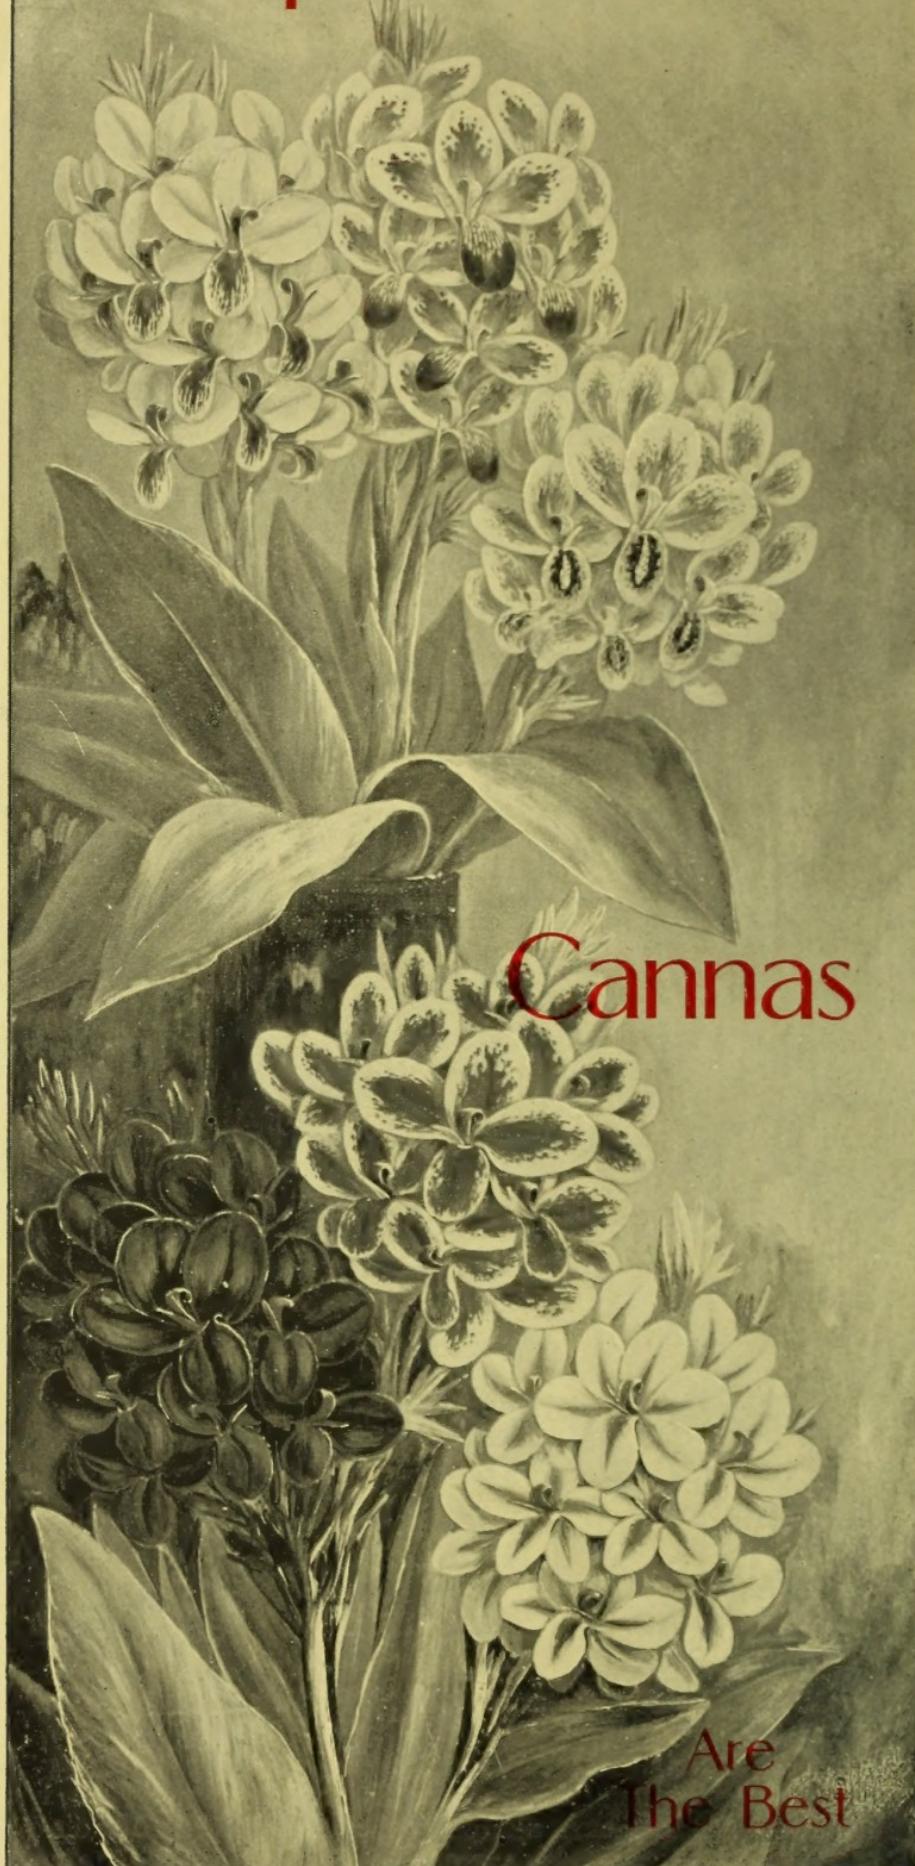

and the claim of reliability goes with every label bearing the name.

Novelties

Many of which pass away. Those that are of proven merit we list and keep in stock, and offer at most reasonable prices.

We pack in the best known manner and ship either by mail, express billed from Jacksonville, or fast freight billed from Greenland to most remote points with safety. Let distance be no object—save your orders for us.

Pampas Grove

Cannas

Are
The Best

No costly exotic plant nor palm nor fern can surpass these superb CANNAS. Their beauty, richness of color, grace of outline, ease of culture and earliness, profusion and certainty of bloom, and EFFECTIVE DECORATIVE VALUE, are UNEQUaled by any other plant known.

Address: ARNOLD PUETZ, GREENLAND, FLORIDA.
